

NANORADIO AB was founded in March 2004 and is a new Swedish semiconductor supplier targeting the Cellular handset and consumer electronics market. The company is "fabless", that is all manufacturing is outsourced. NANORADIO has developed a state of the art technology for integrated circuits with focus on the critical success factors for handheld products, namely, current consumption, physical size, total cost for customer and customer support. The company is formed by a team of 75 people with extensive experience from the cellular and wireless industry as well as semiconductor industry and start-ups. NANORADIO's unique low power WLAN chipset makes high speed wireless access possible in portable electronics.

NANORADIO Hellas was established in 2007 aiming to provide Verification and Software design services based on a group of talented engineers with many years of industrial experience and a proven record of delivering WLAN turn key solution.

Patras 6/26/2008

Vacancy Description: [Ref. NRP002]: Integration and Verification (I&V) Test engineer, reporting to I&V manager.

Skills:

The ideal candidate should have experience in at least 3 of the following areas:

- Experience with network testing and TCP/IP technologies
- Good analysis skills of network traffic.
- Good skills in documentation of test activities
- Experience in integration and test of embedded software.
- Experience in using source version control tools (PVCS/CVS)
- Knowledge in scripting languages like Perl, TCL and Linux shell scripting

Good knowledge of oral and written English is a prerequisite.

Experience on any of the following is highly desired:

- Knowledge in 802.11 standards and regulations
- Knowledge about Linux systems
- Knowledge in C/C++-language programming
- Knowledge in Wi-Fi Alliance test plans

Responsibilities:

- Develop and perform automated functional tests, regression and system tests
- Maintain test setups (including regression test stations)
- Integrate and verify deliveries from R&D
- Support the software development team by providing debug information

Personality:

NANORADIO Hellas is looking for open minded, self motivated engineers to become members of a relatively small visionary team. Well organized people, impassioned with innovation and willing to support development of high quality products until the final production stage are the right candidates for our company

Package:

NANORADIO offers a generous remuneration package which includes high class benefits in addition to the salary.
