

## Software Developer (Backend) - ClearSkies™

### ABOUT US:

Established in 2002, Odyssey is a leader in Information Security and Risk Management, providing (beyond) Advisory Services that empower organizations around the world to securely conduct their business in a dynamically expanding and increasingly perilous information-threat landscape.

Our 360° approach encompasses a complete range of (beyond) Advisory Services comprised of Governance, Risk & Compliance (GRC), Managed Security Services (MSS), IthacaLabs™, Integrated Solutions, and Cloud Transformation.

Among our homegrown products is the award-winning ClearSkies™ Big Data Advanced Analytics Platform, an innovative service delivery vehicle via which we offer an array of next-generation Software-As-A-Service (SaaS) and Platform-As-A-Service (PaaS) products.

Odyssey is ISO 27001, ISO 9001 certified and accredited by the Payment Card Industry Security Standards Council (PCI SSC) as a Qualified Security Assessor (QSA).

### IT'S GREAT WORKING HERE!

We are the first Cypriot company to have achieved a Great Place to Work™ certification in 2020 and we have been included in the Cyprus Best Workplaces™ list for 2021. These recognitions signify our commitment to creating an environment where our people can enjoy their day-to-day as well as feeling empowered to get where they want to go. As we continue to grow, we're committed to being a great global employer, integrating the human factor into everything we do while tapping into the power of technology to drive meaningful change.

### THE ROLE:

Are you passionate about Software Development and would you enjoy working towards the continues development of our homegrown, award-winning ClearSkies™ Big Data Advanced Analytics Platform? If you like working with the latest and most exciting technologies, thrive in an agile environment and continuously challenge yourself, then look no further.

As a backend developer, you will be responsible for analyzing, developing and implementing the core functionality of new features, coming up with innovative and efficient solutions and overcoming any challenges along the way.

### PRIMARY RESPONSIBILITIES:

- Analyzing functionality requirements, designing, developing and implementing software solutions

- Interacting with Front-End developers, architects, researchers and analysts to achieve the best possible result
- Investigating and diagnosing issues, suggesting and implementing solutions
- Identifying and pointing out issues across the stack as early as possible in the Development cycle and assisting in overcoming them
- Remaining abreast of technology trends and developments

### SKILLS / ATTRIBUTES REQUIRED:

- Hands-on experience with .NET/C# (or similar programming languages)
- Experience in relational databases (MSSQL or similar)
- Solid understanding of Object-Oriented Programming principles
- Solid understanding of API development and integration with Front-End
- Experience with one of the below will be considered an advantage:
  - .NET Core
  - Parallel programming
  - Entity Framework
  - Dependency Injection
  - Big Data technologies
- Familiarity with JIRA and git (or other similar tools)
- Passion for learning, embracing challenges and innovation
- Analytical mindset and problem-solving skills
- Team-player with a positive mindset, strong focus and work ethic

### QUALIFICATIONS:

- BSc in Computer Science or another related field
- 2+ years of experience in a Development team
- Any post-graduate qualifications will be considered an advantage
- Relevant certifications and courses will be considered an advantage

### What we Offer

- Competitive remuneration package (according to experience and qualifications)
- Private health & life insurance
- Provident fund scheme
- Flexible Work from Home policy
- Performance-based awards and bonus
- Access to latest technologies and frameworks
